Proposals—

For the following contracts: Section 3, Wards Island sewage treatment works; contract 3, tunnels; contract 4, Manhattan grit chamber substructure; contract 5, The Bronx grit chamber substructure, 3848.
 For test borings, contracts 1 and 2, for the intercepting sewers of the Wards Island project. Contract 1, includes rock soundings and test borings along the line of the proposed intercepting sewers in the Borough of Manhattan from West 179th street to East 73d street, and in the Borough of The Bronx from St. Anns avenue to Jerome avenue. The depth of borings on The Bronx and Manhattan intercepting sewers may vary in general from 10 feet to 65 feet and the majority of the borings are expected to be from 25 feet to 40 feet in depth. Contract 2 includes test borings on land and water along the line of the proposed tunnels between the Boroughs of The Bronx and Manhattan and Wards Island. The depth of land and water borings along the line of the tunnels will probably exceed 300 feet in depth with the possibility that some of the holes may be carried to over 400 feet in depth. The principal items of work to be done consist approximately of the following: Contract 1, rock soundings, 1,500 lineal feet, averaging about 10 feet in depth; sinking casings on land, 9,000 lineal feet; diamond drilling on land for 1½-inch cores, 2,600 feet, and including ground water levels by the strainer method, dry samples and appurtenant work. Contract 2, sinking casings on land, 1,200 lineal feet; in the river, 700 lineal feet; diamond drilling for 1½-inch cores, on land, 5,000 lineal feet, in the river, 3,500 lineal feet, and including ground water levels by the strainer method, dry samples and appurtenant work, 4063.

Public notice, 4093.
